PROJECTS

Lake Wickaboag Boat Club Website

Lake Wickaboag Boat Club website, a functional application tailored for a freelance client. This full stack website was built with the robust technologies of the MERN stack. The site also boasts a responsive and visually appealing design powered by Tailwind CSS.

Utilizes JWT (JSON Web Tokens) for secure authentication and protected routes implemented through React Router, allowing only authorized users to explore specific areas. Leverages React's latest features, such as Context to ensure scalability and maintainability.

Stats App

Full stack web application, built with Vite, React, TypeScript, Node.js. The app allows users to perform statistical calculations on their data conveniently with either manual entry or excel file upload. Utilizes OAuth for secure authentication, Tailwind CSS for styling, and Daisy UI for additional UI components.
